Description

The applicant has a track record of an excellent cooperation with the Technical university in Zvolen. Together they achieved to build an information point for global education. They published two publications, created an e-learning, organized several public lectures, implemented topics connected with global education into several study subjects. Topics linked with global education are rarely present in university curriculums in Slovakia. The aim of the presented project is to educate the educators, to provide them contact with excellent foreign lecturers and with each other, in a homely atmosphere of Zajezova Education centre. We will publish a book of interviews with people from praxis, connected to the Global education. This publication may very well serve university students, high school students, and the public.
