End of Commitment	2021-08-31
Currency	EUR
Status	OECD approved

Description

The overall objective of the project is to improve the quality of life of Moldovan residents through efficient and sustainable management of water resources and waste. The specific objective of the project is to improve the quality of life and health of the people of Moldova through efficient and sustainable management of water resources, waste management and environmental protection. The project's role is to support the Republic of Moldova in the process of enforcement of the Law on Waste no. 209 from 29.07.2016 in order to prevent and reduce the adverse impact on population and human health caused by unsound waste management, including hazardous waste. In the submitted project, this should be achieved by activities aimed at improving the system of waste management, its processing and reporting. Activities will be implemented through the preparation and strengthening of the legislative framework focusing on control activities, capacity building in this area will also be implemented by practical working meetings and study visits of Moldovan environmental inspectors to Slovakia. A part of the project also involves a visit of representatives of the Slovak Environmental Inspectorate in Moldova, which aims to share experience and demonstrate control activities in the conditions of Moldova. The main project activities listed below include several support activities and meetings that need to be implemented: - Analysis of the current situation regarding compliance with the Waste Act and related legislation - Development of a proposal (guidelines / recommendations) for specific chapters of the legislation on compliance with waste legislation - Pilot inspections for a Waste Management Checklist in a set of at least 5 to 10 economic entities at the State Environmental Inspection (SEI) circuit level - Study visit to Slovakia - cooperation with environmental agency / waste management inspection The implementation of activities leads to capacity building and awareness raising on the need to enforce the provisions of the Moldovan Waste Act and to provide information on new legislation and control methods.
