BILATERAL AID

Intensification of the recovery of waste delivered to the Srem-Mačva landfill

General Information

Funding entity	Slovak Aid
Recipient Country	Serbia
Implementing Organization	DAVOIL, s.r.o.
Implementing Organization Code	Private sector in provider country
Geo Location	Sremska Mitrovica, RS
Longitude	19.61222
Latitude	44.97639
Start of Commitment	2019-09-12
End of Commitment	2021-03-31
Currency	EUR
Status	OECD approved

Description

Within the contacts in Serbia, the applicant established relations with a company that has an impact on the waste landfill operator Srem-Mačva (Sremska Mitrovica). Companies agreed on the preparation of the project "Intensification of the recovery of waste delivered to the Srem-Mačva landfill". Within the sub-activity 1 of project, the partner will ensure the elaboration of the basic input analysis. In this analysis will assess the conditions for the location of equipment of Slovak origin in Serbia. The assessment will be made due to legislation (technology transfer, environmental criteria, business environment), business (market success, competitive environment, market potential, price development), technical (security, quality and availability of suitable facilities, design , suitable manufacturing companies, material, energy requirements, environmental impact , method of establishment of equipment to target country conditions, human resources). Within sub-activity 2 partner provides a detailed analysis of the quality and composition of wastes delivered to landfill according to individual waste streams in accordance with EU legislation with a focus on plastic wastes, they also focus on their composition, at least according to PP (polypropylene) and PE (Polyethylene). This research will take place for assuming 1 year. Under sub-activity 3, a technical-operational solution for the project "Intensification of the recovery of waste delivered to the Srem-Mačva landfill" will base on the acquired data and analyzes. This solution will take into account the environmental criteria, be based on real volumes, quality of recyclable waste inputs and include a set of technology lines of appropriate parameters and performance.
