Currency	EUR
Status	OECD approved

Description

Bosco Boys center in Nairobi is a boarding institution for former street children. The center is a long-term partner of the applicant, who has already realized two projects in Bosco Boys with help of Sloakaid - the first one introduced rehabilitation and educational system, thanks to the second one, workshops for obtaining practical skills were built. Monitoring visit of Sloakaid appreciated the interventions realized and recommended to develop sustainability possibilities for the center. The applicant does not intend to support the partner through projects in the future. Therefore, sustainability is one of the main pillars of the presented project. The partner has tested furniture production of the center with surprisingly positive results. The project would like to develop this potential and support self-sufficiency of Bosco Boys. Business plan will be developed in order to identify other income generating possibilities. Fundraising strategy will diversify external financial resources. Interventions realized in the past will be improved and completed. Interventions realized and planned are framed into a three-phase program of Socioeconomic integration of former street children. By improving and completing the program and by supporting its sustainability, the project intends to create a universal model of effective solution for street children problematics.
