

AID DETAILS

BILATERAL AID

Supporting Employment in Electrotechnical industry

General Information

Funding entity	Slovak Aid
Recipient Country	Kenya
Implementing Organization	SAVIO o.z.
Implementing Organization Code	NON-GOVERNMENTAL ORGANISATIONS (NGOs) AND CIVIL SOCIETY
Geo Location	Langata Rongai, KE
Longitude	36.76458
Latitude	-1.3971
Start of Commitment	2018-08-06
End of Commitment	2020-08-31
Currency	EUR
Status	OECD approved

Description

The main objective of the Supporting employment in electro technical industry project is to decrease unemployment of young people in Kenya through practical skills. Target group of the project are poor young people from Nairobi slums who have limited possibilities to obtain education. Therefore, specific objective of the project is to improve possibilities of disadvantaged youth in Nairobi to join labour market. The project plans to achieve this goal through building practical skills in electro technical specialization of refrigeration and AC, as well as through other employment supporting activities. The project will take place in a government-certificated Technical Institute Don Bosco Boys Town in Nairobi. Electro technical industry is a fast growing industry in Kenya. However, labour market is lacking qualified workforce to ensure installation and maintenance of equipment concerned. Thus, project plans to open a course of electro technical specialization refrigeration and AC, what will be the first project result. New specialization will be added to an existing solar energy specialization and thus will expand possibilities to obtain practical skills in the field. Workshop hall will be renovated and equipped with necessary furniture and equipment. Afterwards, the course will be opened. Important part of the project will be focused on linking graduates with labour market, what will be the second planned project result. Students will take part in on the job training, career orientation seminar, entrepreneurship training, talented students will receive a start-up kit to support their self-employment. Project will ensure monitoring and support to employed graduates. The third planned result is a higher quality of education and services in Boys Town. Project will equip workshops with new equipment and material what will increase quality of practical classes and attractiveness of students to future employers. Higher quality of education and services will be achieved also through trainings of pedagogical skills and preventive system for teachers, as well as through psychological services for Boys Town students.

Commitments and Amount Extended (EUR)

Reporting Year	Commitments	Amount Extended
2018	175 352 €	50 000 €
2019	0 €	100 000 €
2020	0 €	23 743 €
Total	175 352 €	173 743 €

Sectors share

Sector name	Share
Vocational training	100.0 %
