## BILATERAL AID

### Support in Development of Waste Water Management in the Moldovan Centre Region - Better Waste Water Management Step by Step

#### General Information

<b>Funding entity</b>	<b>Slovak Aid</b>
Recipient Country	Moldova
Implementing Organization	Regionálna rozvojová agentúra Senec-Pezinok
Implementing Organization Code	Donor country-based NGO
Geo Location	Republic of Moldova, MD
Longitude	28.58333
Latitude	47.25
Start of Commitment	2018-08-15
End of Commitment	2020-05-31
Currency	EUR
Status	OECD approved

#### Description

Low accessibility of the sewerage system is a long-standing problem in Moldova. The project proposal focuses on the Central region of the the Republic of Moldova and the town of Strasen. Only 15% of the population has access to the sewerage system (the national average is 30%). In Strasen (about 22 thousand inhabitants) access to the sewerage system is secured for only 61% of the population, which is little in the urban area. The town also does not have a waste water treatment plant. A poorly developed sewerage system is one of the factors that create unfavourable sanitation conditions and cause more frequent outbreaks of infectious diseases, and it is also a barrier to further socio-economic development. The project aims to support the development of waste water management in the Central region. The support will be built on three interconnected pillars: (1) support to the extension of infrastructure - the construction of a sewerage connection in the town of Strasen (2,640 m of newly built sewerage serving 1080 inhabitants/308 households), and the elaboration of a Feasibility Study and an Environmental Impact Assessment for the missing waste water treatment plant in Strasen; (2) capacity building of 12 urban water management operators (municipal enterprises) and 13 municipal authorities of the Central Region through the implementation of two expert workshops and two study visits in Slovakia; (3) engagement of the public in the Central region and raising awareness about responsible approach to environment with emphasis on the proper management of household waste water. Education of the community will be delivered in form of an educational summer camp for 20 young people who, in addition to acquiring knowledge, will develop their own local community water management projects, and present their community. Community information activities and campaign will also be held at the annual town festival.

Commitments and Amount Extended (EUR)

Reporting Year	Commitments	Amount Extended
2018	199 251 €	9 963 €
2019	0 €	139 476 €
2020	0 €	49 064 €
Total	199 251 €	198 503 €
