| Currency | EUR |
| Status | OECD approved |

Description

The aim of the project is to support the integration of development issues and their integration into curricula at individual levels of Slovak schools. The project responds to the current need in Slovakia for global and development education on level of capacity building and inclusion of global education principles at the secondary school level. Objective 1: Building capacities for introducing global and developmental themes into the teaching process at secondary schools. Objective 2: Inclusion of development themes into curricula and curricula of secondary schools. Target groups and activities: The project is designed in two lines. The first is a series of training sessions aimed at 10 teachers of one secondary school, 5 youth workers and 70 pupils of one secondary school. The common denominator of training is active citizenship and methods and principles of global and development education. The themes are focused mainly on the fight against extremism, critical and analytical thinking, argumentative skills and leadership. In the second line there are workshops: the "Bistro Afrika" theatrical show with discussion and Live Libraries targeting pupils of various secondary schools in Slovakia (at least 640 pupils). These workshops are organized by the applicant. At the same time, activities organized by trainees are being carried out, aiming at transforming acquired skills and competences into practice, and leading to the sustainability of active citizenship and the integration of the themes of global and development education into the curriculum.
