Longitude	43.25
Latitude	37.0
Start of Commitment	2018-08-23
End of Commitment	2019-10-31
Currency	EUR
Status	OECD approved

#### Description

The project proposal aims to improve health care conditions of internally displaced refugees in Iraq. The aim is to decrease morbidity and mortality of internally displaced refugees. The project is planned to take place in 2 locations - Dawoodia refugee camp (with more than 8,000 inhabitants) and 5 countryside locations in Dohuk Province (Sharya, Sina, Sheladze, Balqosh and Gersheen) as both of them struggle with access to health care, which will be significantly improved after the project implementation. The following results are expected: Result #1: Access to health care services in Dawoodia camp. Thanks to the implementation of the project at least 9,600 refugees will be provided access to health care services in the already existing health center located in the camp. Due to lack of financial resources and lack of personnel the health center could be used only in limited scope. More than 5,000 children (under the age of 5) are expected to be treated during the duration of the project. In addition, at least 800 pregnant women will be provided health care services and 900 children will be enrolled in the vaccination program. Medical doctor will be employed and the health center will be regularly supplied with necessary medical equipment according to the patients' needs Result #2: Access to health care services in Dohuk Province thanks to a mobile health center Currently countryside locations of Sharya, Sina, Sheladze, Balqosh and Gersheen have no access to health care services. The main reason is the lack of proper infrastructure and lack of health care professionals (medical doctors & nurses) as well as proper equipment. As a result of the project implementation a mobile health center will be created and at least 9,600 patients are expected to be treated during the duration of the project and a medical doctor is expected to be hired. Result #3: Improved nutrition for children in Dawoodia camp thanks to a antimalnutrition center There are approximately 1,500 children (under 5) in Dawoodia camp who are currently under threat of malnutrition. The project will ensure nutritional screening for children as well as their subsequent treatment. In order to achieve the planned results the following activities are expected to take place: •

## Commitments and Amount Extended (EUR)

Reporting Year	Commitments	Amount Extended
2018	199 990 €	159 992 €
2019	0 €	39 998 €
<b>Total</b>	<b>199 990 €</b>	<b>199 990 €</b>
