| Start of Commitment | 2020-07-15 |
| End of Commitment | 2022-07-31 |
| Currency | EUR |
| Status | OECD approved |

Description

Project - Installation of Analytical Methods for the determination of organic pollutants required by the Water Framework Directive 2013/39/EU in the Center for Eco-Toxicological Research Podgorica is focused on the installation of analytical methods used for the determination of priority organic compounds defined in Water Framework Directive (2013/39/EU) in surface waters in the organization responsible for monitoring of organic compounds in Montenegro's environment (Center for Ecotoxicological Research in Podgorica - CETI). Installed analytical methods will be fully compatible with the requirements for technical specifications for chemical analyzes and monitoring of the status of waters applied in EU Member States (2009/90/EC). Within the project, staff of the Center for Eco-toxicological Research in Podgorica will be trained to be able to react to the planned amendments of the environmental legislation as well as to independently meet the EU requirements in the creation of the lists of specific pollutants for Montenegro.

Commitments and Amount Extended (EUR)

| Reporting Year | Commitments | Amount Extended |
|----------------|-----------------|-----------------|
| 2020 | 78 780 € | 39 390 € |
| 2022 | 0 € | 34 557 € |
| Total | 78 780 € | 73 947 € |
