Latitude	1.0
Start of Commitment	2022-09-12
End of Commitment	2024-09-30
Currency	EUR
Status	OECD approved

Description

The aim of the projekt is to decrease the unemployment of youth by improving access to quality education and practical skills. The project will create conditions for digitalized learning process as well as a quality vocational education at the St. Philip Neri School with regards to the current education reform in Kenya. The target group is 1,200 pupils of the school who will eventually benefit from their increased competencies and subsequent competitiveness at the labor market. Project implementation will create conditions for the establishment of a fully-fledged reference boarding school in line with the current education reform in Kenya which, among others, integrates selected primary and secondary schools into one complex institution. In addition, 6,500 teachers in Machakos County will be educated in digital skills as well as the new competency-based-curriculum (CBC). Furthermore, 250 students of Ngalalya High School will finally have proper access to IT courses. The following results are expected to be achieved: Result 1: Teaching and Training Center for digitalization. Local partner is ready to gradually incorporate the new education reform through the learning process digitalization. The planned result will be achieved by the construction and equipment of the Teaching and Training Center with a total area of 562.8 m². It will be an extension of the first floor of an existing ground floor building. The Center will be equipped with proper IT equipment and didactic technology as well as furniture, books and will be run thanks to solar panels. Result 2: St. Philip Neri School providing quality and modern digitalized primary and secondary education. This result will be achieved by completing the missing infrastructure, purchasing the missing equipment for the school and the implementation of modern curriculum in line with the new school reform. To complete the missing infrastructure, new sanitary facilities will be built, the Agricultural Training Center with a new well and a water tower will be completed, and a sports complex will be built. Proper digital technologies will be provided. 1,200 primary school pupils will be educated in robotics and programming. Result 3: Increased inclusion of disadvantaged groups of students. This result will be achieved by
